128 288 329

89

Edited by Pavel Mazal

CONTENTS

Algernon D., Wiggenhauser H. <i>Identification of short transient signals within impact-echo data using the Hilbert Huang transform</i>	9
Algernon D., Wiggenhauser H. <i>Experimental investigation of the acoustic wave propagation in concrete structures after impact excitation</i>	19
Anton O., Hobst L., Štěpánek P., Vítek L. <i>Radiographic control of reinforcement in damaged roof trusses of industrial hall</i>	31
Avramenko V.G., Lebedev O.V., Kirzhanov D.V., Budadin O.N., <i>Solution of the inverse problem of nonstationary heat conductivity in multilayer objects using FFT</i>	35
Běhal, J. <i>Applications of non-destructive testing to investigation of aircraft structure integrity</i>	43
Blaháček M., Převorovský Z., Chlada M. <i>Elastic wave propagation in complex aircraft structure</i>	47
Chlada M., Blahacek M., Prevorovsky Z. <i>Neural network AE source location based on extracted signal features</i>	55
Döring D., Pfeleiderer K., Solodov I., Busse G. <i>New opportunities for material characterization and damage detection with air-coupled and nonlinear ultrasound</i>	63
Faci Y., Abbas A., Mebtouche A. <i>Ultrasonic device calibration for estimation of retained austenite in tool steel</i>	71
Fiala J., Šutta P. <i>X-ray monitoring of materials degradation</i>	75
Gliozzi A.S. <i>2-D Nonlinear models and simulations as a tool for NDE in AERONEWS</i>	83
Goursole T., Dos Santos S., Meulen F.V., Haumesser L. <i>Contact phase modulation measurements in bilayer solids using nonlinear means</i>	93
Hajek K., Sikula J., Hefner S. <i>Parametric ultrasound-electric spectroscopy for NDT of metal bodies</i>	103
Hirsekorn S., Haffner R., Gebhardt W., Arnold W. <i>Measurement and evaluation of nonlinear ultrasonic transmission on adhesive bonds</i>	111
Jae K.Yi <i>Phase transformation measurements by applied magnetics</i>	121
Janousek L., Zhenmao Chen, Noritaka Yusa, Kenzo Miya <i>A novel eddy current testing probe suitable to the inspection of thick structures</i>	125
Kiejn Lee <i>Noncontact and nondestructive characterization of metallic and organic thin films by using a near-field microwave</i>	131
Kirzhanov D.V., Avramenko V.G., Lebedev O.V., Budadin O.N. <i>Automation of heat NDT of buildings</i>	139

Koktavy P.	<i>Noise spectroscopy of mechanical stressed insulators by means of electromagnetic emission</i>	147
Koktavy P., Koktavy B., Sikula J.	<i>Partial discharges and acoustic emission in insulating materials</i>	153
Kühnicke E.	<i>Relation between the transient and the harmonic field of ultrasound transducers</i>	159
Kusak I., Lunak M., Schauer P.	<i>Impedance spektroskopy of cetris-basic wood-cement chipboards</i>	171
Kusak I., Lunak M., Schauer P.	<i>On the water content dependence of cetris-basic wood-cement chipboards</i>	175
Kvita P., Prevorovsky, Z.	<i>Evaluation of ultrasonic propagation parameters and mechanical properties of the stressed human skin in vivo</i>	179
Li Yi-bo, Jin Shi-jiu, Sha Ji-le, Sun Li-ying	<i>Study on ultrasonic guided waves in fluid-filled pipes surround by water</i>	187
Maev R.Gr.	<i>New generation of high resolution acoustic imaging technique for material characterization and NDT</i>	197
Majzner J., Sedlak P., Sikula J., Hefner S. and Lokajicek T.	<i>Cracks localization by electromagnetic and acoustic emission</i>	211
Matysík M.	<i>On the effect of additives on the cement hydration heat development progress</i>	215
Myagotin A., Helfen L., Banhart J., Baumbach T.	<i>In situ radiography of metal foaming processes: a quantitative analysis</i>	223
Obbadi A., Belattar S.	<i>Three dimensional non destructive study of a delamination of a wall by the surface temperature analysis</i>	235
Schubert F.	<i>Acoustic emission tomography – a new imaging technique for structural health monitoring</i>	243
Schubert F., Köhler B, Zinin P.	<i>Time-resolved acoustic microscopy simulations for micro NDE applications</i>	257
Schubert S., Gsell D., Niemz P., Motavalli M., Dual J.	<i>Numerical simulation of elastic wave propagation in the radial-tangential plane of wooden trunks with and without fungal decay</i>	271
Siddiolo A.M., Maeva A.R., D'Acquisto L., Maev R.Gr.	<i>Air-coupled imaging method applied to the study and conservation of paintings</i>	281
Swiderski W.	<i>Infrared nondestructive testing in military applications</i>	289
Wendrich A., Krause M., Maierhofer Ch., Wöstmann J., Milmann B.	<i>Application of ultrasonic and radar tomography for the investigation of the internal structure of masonry</i>	299

Abstracts and papers after deadline

Bilgram R., Stöbel R., Diez-Vazquez M., Migueles J.R, Schimitschek J., Gradolph Ch. <i>Simulation of heat generation and dissipation during ultrasonic excited thermography</i>	317
Delsanto P.P, Hirsekorn S., F. Pastrone <i>The universality of nonclassical nonlinearity and applications to NDE</i>	318
Helfen L., Kiel D., Pernot P, Mikulík P., Baumbach T. <i>Three-dimensional imaging of microsystem and microelectronic devices by synchrotron-radiation computed laminography</i>	319
Köhler B. <i>Study of elastic wave propagation for NDT and health monitoring applications</i>	320
Lebedev O.V., Avramenko V.G. Kirzhanov D.V., Budadin O.N. <i>Multi-phase heat-mass transfer and calculation of the current position of the front freezing and dew point in the buildings</i>	323
Lehmann M., Büter A., Frankenstein B., Schubert F., Brunner B. <i>Monitoring system for delamination detection</i>	324
Mayer Klaus, Langenberg K.J., Marklein R. <i>Modelling and imaging for electromagnetic and elastic wave scattering in concrete</i>	326
M. Acebes Pascual, A. Poblete <i>Thermographic and ultrasonic measurement of the effect of humidity in mortar porosity</i>	327
Spies M. <i>Semi-analytical modeling applied to optimize the performance of ultrasonic inspections</i>	329
Vrhel, J. <i>Czech partners contribution to the AERONEWS EU project</i>	330
Wilcox P. D., Konstantinidis G., Drinkwater B.W. <i>Structural health monitoring using guided waves: active and passive techniques</i>	331
Prevorovsky Z. <i>Ultrasonic signal transfer in thin extended aircraft parts - experiments and modeling</i>	332
Vrhel, J. <i>Czech partners contribution to the AERONEWS EU project</i>	340
